Douglas Credit System Is Interesting Topic at Public Meeting

Calgary Speakers Give Explanation of Proposed Reforms in Economic System

A meeting was held in the K P hall Monday evening when speakers from Calgary addressed a small but interested audience on the Douglas System. H. Snowden was chairman and introduced the speakers' J. Unwin and Mrs. W.W. Rogers.

The meeting opened by singing the national anthem. Mrs. Rogers chose for her subject of address the "Machine Age". She pointed out that the three main factors in industry were Production, Distribution, Consumption. Machines were able to produce all necessary production which resulted in less man power being used. The decreasing use of man power resulted in increased unemployment which resulted in misery and starvation for the man and his family. To remedy this condition the Douglas System proposes to give each bona fide Alberta citizen over twenty one years of age a basic dividend each month so that he may have purchasing power to consume what has been produced. As a result of this dividend man is enabled to become the master of the machine rather than the servant. Shorter working hours would result, giving man greater time for leisure and study and recreation which would in time result in a greater and better civilization.

Mr. Unwin spoke on the "Social System". The social system, he said, was social credit and Alberta had natural resources valued at two billion which gave this province enormous credit. Credit was the one factor on which industry was based. He proposed the establishment of a state credit house. From this credit house each citizen of Alberta would receive a basic dividend of credit each month. This money or credit would be spent each month on goods produced in Alberta. The natural resources of the province are capable of supplying a large percentage of the people's needs. This purchasing power given the people would in return give a boost to production, bringing greater wealth to the province. Mr. Unwin then illustrated how funds would be obtained for the state credit house through the increased purchasing power of the people.

At the close of the meeting a number of questions were asked. Mr. Unwin answering each one satisfactorily.

A committee is at present at work to have the speakers brought back to Coleman within the next five weeks when they will undoubtedly be heard by a larger audience than that of Monday evening.

The local committee responsible for arrangements are Wm. Antrobus, Albert Knowles and H. Snowden. The meeting was called on short notice, otherwise it is likely a larger number would have attended, as many have expressed a desire to hear more of the Douglas system of social credit.

Portable Radio Set

Sentinel Motors has for demonstration a set which can be operated with a 6-volt storage battery if electric current is not available.

It brings in distant stations as effectively as high-priced standard sets, and can be used in automobiles. Mr. Schwartz, sales representative, will gladly give a demonstration. Telephone 21 or call at Sentinel Motors.

Mother and Daughter Banquet in U.C. Club Room

A delightfully prepared banquet was held on Monday evening, attended by about sixty mothers and daughters. Rev. Roy Taylor spoke briefly on the place of the home and the church in the life of the teen-age girl. Mr. Fairhurst also spoke very helpfully. The girls gave a splendid account of themselves, reflecting credit on their leaders, Miss O. Hole, Miss Jean Pattinson and Mrs. Taylor.

Mrs. G. Pattinson responded for the mothers, and Mrs. A. Beveridge acknowledged the flower presentation to the mothers. The program closed with the singing of "Taps."

Proposed Library For Coleman

Miss Montgomery of Edmonton, representing the extension department of the university, was in town on Monday for the purpose of arranging the placing in Coleman of a circulating library. The signatures of ten responsible persons are required to have this established, and the first consignment of books will be sent out after the summer holidays.

A convenient place for the distribution and receiving of books must be provided for by the local committee, and a person appointed to act as librarian. If 50 people value themselves of the privilege of borrowing books the cost of carrying this on it is estimated would not be more than \$1.25 a year to each borrower. It is a service which doubtless will be appreciated by many local people. Names of those desiring to take advantage of this library should advise Rev. Roy Taylor at The Journal office, tel. 309.

ST. PAUL'S UNITED CHURCH

Sunday morning, May 20, the minister will take as his subject—"A Glorious Picture of a Victorious Church," a study of Pentecost. The junior choir will sing. Sunday school will meet at 12:12.

The evening service will be taken by Mrs. Taylor. Mothers Day service was marked by an impressive service in charge of the Sunday school, directed by Miss Olga Hole and Miss Ethel Dunlop. An impressive pageant and suitable stories and singing combined to make an impression not soon to be forgotten. Flowers were presented to the mothers and an offering was received for the Religious Education Council of Alberta.

Newspaper Circulation

The real test of the value of circulation to advertisers in a newspaper is the buying power of those who read it. Exaggerated claims of advertising sheets, without any verification whatever, count for very little. Most of them may go into the hands of people who probably are not influenced by the advertisements appearing therein.

Advertising having the greater pulling power is that which is typographically arranged in such a manner as to create a favorable impression. Messages to interest people must be dressed up similar to a salesman being well dressed to receive favorable reception. Reader interest is also of paramount importance, and The Journal unquestionably possesses live local interest to Coleman buyers.

Coleman Adanacs beat Michel girls 4-3 in a soft-ball game played at Michel on Wednesday. The Adanacs thank J. Bushon and H. Tiberghien who so kindly loaned their cars to transport the girls to Michel.

Handsomeness Building To Improve Appearance of Main Street

Italian Society Show Commendable Enterprise in Reconstructing Old Landmark

A transformation from a dilapidated building into the finest store building in the Pass is the objective of the Italian Society in Coleman. Their building on Main street is to be remodelled, providing accommodation for two stores and an electrical supplies shop, while the second floor will be continued in use as an assembly and lodge hall.

The front of the building will be of mission stucco, plate glass windows in store fronts with colored Vitrolite insets. Steel balconies will ornament the front and west side. A five room suite, and living quarters for caretaker will be included in the building, which has 60 feet frontage on Main street and 100 on the west side. Modern conveniences will be installed throughout. The lodge hall will be 80x50 feet, with a small stage on the east side.

The first stage of the work will cost about \$6,000, and the ultimate objective will involve a total cost of \$10,000.

Great credit is due the Italian people of Coleman for their enterprise in financing this work. Last year they paid out \$27,000 in local relief to their people, and during their total disbursements for relief approximately \$60,000. None of their people have gone on relief. The Society taking care of all needy cases. It is planned to have the reconstruction work completed for a grand opening on July 2. Contractor J. B. D'Appollonia is in charge.

Proposed Boxing Card for July 2 at Coleman

A strong card is being lined up for July 2 by Promoter Barringham when head liners will be Emil Lutz of Medicine Hat vs. Louis Kwieczak of Drumheller, a Polish boxer of note who has a number of supporters here anxious to see him in a ten 8 minute round match. The welter-weight title is at stake, both men being 147 lbs. Kwieczak being the challenger.

The semi wind-up will be between Gus Volney, featherweight champion in Calgary amateur circles who turned professional, who challenges our own Kid Winters for the western Canada champion ship, weight 127 lbs.

In order to stage this card, Barringham must have a guarantee to bring the men here. He is selling tickets in advance, and provided he secures sufficient by June 18, arrangements now pending will be completed. He deserves support in his efforts to maintain interest in the fight game, as he has always staged good programs in Coleman.

Cattle and horses have been running wild again this Spring, doing considerable damage and disheartening those who try to make this town a place to be proud of. Why cannot the police patrol the outskirts once in a while? Neighbors do not want to inform on one another. It is the police's duty to check up and save these people expense.—Pincher Creek Echo

The students of the Coleman schools have been in intensive training for the past two weeks for the sports day to be held in Blairmore on Monday, June 1.

Don't forget the football club dance in Community hall, May 24.

Returned From Ottawa

General Manager Kalkock and Sup't. McLeod returned on Sunday morning from Ottawa, where they had been with other steam coal operators interviewing the government in connection with a proposed extension of subvention aid for western steam coal. A decision on the request will be given later by Hon. Wesley Gordon, minister of mines.

They also interviewed General Macbrien, commissioner of the R.C.M.P., requesting that a police detachment be maintained in Coleman.

Baseball League Organized

A meeting of the Crow's Nest Pass Baseball League was held in Hillcrest this week. Representatives from all Pass towns were present. Geo. Dickson and A. Gentile representing Coleman. The league will consist of four teams, Coleman Hillcrest, Blairmore, Bellevue. The first game of the season will be played Monday night at Coleman when Hillcrest will provide the opposition.

Ten years ago Coleman was experiencing a building boom. The first six months of 1924 saw between 60 and 70 residences built. The Grand Union hotel was built, a new brick school, light and water systems were extended and many other improvements made.

IN MEMORIAM

In memory of Sophia Lendeck. Died May 19, 1929.

Nothing can divide us from mother. Or sever cords of love. She is resting peacefully with Jesus in that beautiful home above.

Sadly missed by her daughter Mrs. J. P. Korman.

Local News

R. J. Dinning, liquor commissioner, was in town to-day.

Mrs. Borden, Mrs. A. M. Morrison and Miss Yuill were Calgary visitors over the week end.

Golf is gaining favor in Japan. Jack Wood wonders what a Jap says when he misses a six-inch putt.

Mrs. T. Flynn journeyed to Edmonton this week to witness the graduation exercises of her daughter Belle, who received her degree of B. Com.

H. B. Collins of the Harris Lumber Co., Vancouver, was here to-day calling on J. B. D'Appollonia taking orders for new stocks of building material.

A meeting of all executives of the softball league met on Thursday evening. It was decided to form two separate leagues, for men and ladies, and all wins in games to date will be cancelled.

Mr. and Mrs. Wm. Hayson, Idris Hayson and Miss Lempi Apponen motored to Edmonton Saturday morning where Idris will take part in the graduation exercises to be held on Tuesday at the Alberta University. He will receive his diploma in Pharmacy.

Ten Year Old Jokes from The Coleman Journal—"What could be more sad," said one of the teachers at Central school, "than a man without a country?"

"A country without a man," answered the pretty school girl.

FOR SALE—Purebred English Setter Pups. Phone 217.

FOR SALE—Three Milk Cows coming fresh soon—Mrs. E. C. Davis, Lundbreck.

Revision of Light and Water Franchise Now Being Discussed

Rate Reduction Will Be Urged By Mayor Pattinson and Council, It Is Reported

The ten year franchise agreement between the town and the Coleman Light & Water Co. about to expire is the subject of negotiations for renewal. It is reported that revisions in rates are to be asked for by the council, but no detailed information is available for publication owing to negotiations being only in the preliminary stage.

Comparison of rates between Coleman and Blairmore, the latter town owning its light and water system, shows a third less charged for electric current, so that representations will be made for a reduction in Coleman. Water rates at present for 6 roomed houses, with a seasonal house charge, are \$47.00 per year, and this will also be subject of discussion.

It is of interest to record that the vote taken on March 6, 1924, on the granting of the franchise, showed 139 for, 48 against.

Herald Improves Service

S. A. Buchanan, circulation manager of the Lethbridge Herald, here to-day, states that hereafter The Herald will be published at 11 a.m. daily and be on sale here by 8 p.m. and delivered by town. This will give a daily news service ahead of any other city daily, and doubtless will prove popular. All sports and important events from Pass towns will be covered in this daily.

The Leader for Over Forty Years

"SANTAL" TEA

"Fresh from the Gardens"

Japan Menaces World Peace

World opinion apparently is agreed that Japan is engaged in intensive preparations for war, primarily with Soviet Russia, and with hegemony of Asia and the Pacific as the direct objective. The evidence cited in support of that opinion are amenable to no other interpretation. There is no gainsaying the fact Japan has embarked on an imperialist policy strangely reminiscent of that which agitated pre-war Europe and which brought civilization to the verge of catastrophe.

Even the time has been set. It is claimed, by Japan's military experts, Armageddon will be let loose in the Orient late in 1935 or early in 1936. A world still struggling to escape the bitter aftermath of a Great War then, at no far distant date, will be faced with another which, unless due precautions are taken, may complete the havoc of the last. The chancelleries of the world, the House of Commons at Ottawa, economists and statesmen generally, are satisfied Japan is headed for war.

What are the evidences which have provided front page stories for newspapers, leading articles for editors and journalists, texts for sermons and subjects for radio lectures, and which point so unmistakably to war in the Far East?

Ever since its Shanghai and Manchurian adventures, Japan has been showing its hand, and has made it plain that establishment of a dummy kingdom, Manchukuo, under its puppet emperor, did not satisfy Nipponese ambitions with respect to the Asiatic mainland. Withdrawal from the League of Nations was but a considered step in a pre-considered plan which envisaged war with Soviet Russia as a necessary preliminary to further imperialist expansion. The recent ultimatum to the great powers designed to prevent financial or armament aid to China, is indicative of the fact that Japan proposes to exercise complete tutelage over that vast territory. The ultimatum, construed as a trans-Pacific "Monroe doctrine", directly affects Great Britain and the United States, both of which have far greater financial interests in China than has Japan.

Furthermore, Japan is arming at greater speed than any other country in the world. More than 40 per cent. of its budgetary expenditures are earmarked for armament purposes. The Nipponese air force is among the most potent in the world. It is asserted the Japanese government is about to demand naval parity with Great Britain and the United States. So far as armaments are an augury, therefore, they point to no far distant war.

What of the economic aspect of the situation, perhaps the most significant of all?

That Japan should have imperialist ambitions is, of course, a direct sequel to its adoption of western "machine" civilization. The growth of its industrial plant and productive power has been accompanied by a rapid growth of population. In ten years, Japan's population has increased from 56,000,000 to 66,000,000. It presses upon the resources of the country. Strangely enough, it has reached the same point at which Germany felt the urge for "elbow room" at all or any cost.

The entire population of the Japanese islands has been enlisted in a gigantic effort to capture world markets. Systematic inflation of currency, ruthless exploitation of the masses, are component parts of the state's mechanism for development of export trade. Japan's exports have doubled themselves in three years. Against the flood of cheap Japanese goods, loosed upon world markets at "murderously low prices", tariff barriers have proved unavailing. Sixty per cent. of Japan's production is exported. Britain and Germany, even in the heyday of their foreign trade expansion, never exceeded 25 per cent.; the United States never has exported more than 10 or 12 per cent.

"Such a mass attack on world trade contains the seeds of its own destruction," says one writer who believes "the foundations will crumble beneath such excessive export trade maintained by the most fantastic exploitation of the native population. Through forced labor, child labor, sweat-shop conditions, generally, Japan is selling abroad at less than production costs—in Japan! The government is behind the productive machine and the export program. Because of its actions, capital equipment (convertible to war purposes) multiplies, dividends are high, while workers slave and their families starve."

How long will it last? The "machine" is geared to run until Japan is ready for war. It would appear to be a race between preparedness on the one hand and national breakdown and insurrection on the other. War will be declared on first threat of the internal crash.

Thus international experts read the handwriting on the wall. Can the counter-motion for peace gain weight enough to prevent the catastrophe before Japan has reached the breaking point?

Removes Brain Tumor

Marvel Of Surgery Reported From

Removal of a brain tumor from a young girl under local anesthetic by Prof. Potenoy at the Leningrad Institute of Traumatology was hailed as a marvel of surgery.

The tumor, the size of a pigeon's egg, was in the middle of the fourth ventricle, and threatened the patient with blindness. To obtain access, the surgeon had to displace the great hemispheres of the brain. The patient was apparently completely relieved.

Few precedents for this operation are cited in world medical annals.

All British army officers having the full rank of general are over 60 years old.

Fish-catching bats inhabit Mono Island, near the island of Trinidad.

A Tired, Worn Out Woman

Can't Make a Happy Home

There is no happiness in the home when the mother is sick and worried by the never ending household duties. She gets run down and becomes nervous and irritable, has shortness of breath, faint and dizzy, can't sleep, and gets up in the morning feeling as tired as she went to bed, and is discouraged and discouraged.

Milburn's H. & N. Pills will soon convince women it is not necessary to suffer, as they build up the nervous system and bring back the former health and vigor.

Search For New Worlds

Astronomers Looking For Planets Four Billion Miles Away

An intensive search by astronomers for more planets in the solar system, which are strongly suspected to exist far out near Pluto, nearly four billion miles from the earth, was announced by the American Philosophical Society. The new planet hunt, if successful, may add several more "worlds" to the nine now known to circle around the sun. Astronomers believe it is "improbable" that several other earth-sized planets similar to Pluto may be circling unseen in space. Pluto is a lonely, forlorn step-child of the sun, more than 40 times as far from the sun as the earth, and so must be extremely cold and completely lifeless and desolate. It is 10,000 miles in diameter, somewhat larger than the earth, but weighs only half as much.

CRAWLING ABOUT WITH LUMBAGO

Here is some useful information for anyone troubled with that uncomfortable complaint, lumbago. A woman writes:

"For years I suffered from lumbago. During wet weather, I could only turn in bed with great effort and pain. I was so stiff and ached so much. Two years ago I had both lumbago and sciatica. I read about Kruschen Salts, so I did, and I have taken them ever since, with the result that I hardly ever get down to the root of the trouble and may be the cause, which is an impure blood-stream. The six salts in Kruschen keep the bloodstream pure and vigorous by promoting a clockwork regularity of all the organs of elimination."

Famous Painting Found

Picture By Millais Passed Out Of Notice In 1875

After many years of search, Millais' famous picture, "No," is now owned by the sister of the model. The picture, which was the chief topic of the Royal Academy Exhibition of 1875, shows a young woman reading a letter in which she has refused a marriage proposal. The original sitter was Miss Dorothy Tennant, who afterwards became Lady Stanley, wife of Sir Henry M. Stanley, the explorer. It was once sold for \$7,000. The recent buyer was Mrs. F. W. Myers, sister of the late Lady Stanley. She had been searching for it for years, but it passed out of notice when bought privately shortly after the 1875 Academy Exhibition.

Cars Easier To Control

If Accidents Occur Drivers Are Largely To Blame

Motor cars of to-day, while swifter of pace, are easier to control than they have ever been. Braking equipment and steering mechanisms have been perfected, they provide a greater degree of safety, steels and alloys entering into the construction of engine and chassis are capable of withstanding greater strains. The fault then, it is clear, is that of the drivers of motor cars—those drivers, particularly, who, despite the convincing testimony of the casualty lists, will not recognize that the modern motor car, carefully handled, is an engine of death and destruction.

Abbey Gets Milk Bath

Historic Westminster Abbey recently received a milk bath. Workmen applied gallon after gallon of skimmed milk to its massive arches, pillars and even its statues. The treatment, recommended by architectural experts, was intended not only to clean the stone work, but to aid in preserving it. The results will be watched with care, although it is said five years must elapse before the value of the treatment is apparent.

What Eating Costs

Here is something to worry about. If you only spend an average of 25 cents per meal during your lifetime, it costs you \$19,250 to satisfy the "inner man." Average individuals eat 77,000 meals in a lifetime. According to statistics compiled by M. Davison, who presided at a meeting of market and grocery owners, restaurant and hotel men, national refrigeration experts and city health authorities at Cincinnati recently.

"My husband wired me from Paris on my birthday asking whether he should buy me a Rembrandt or a Titian. Now, which would you have?"

"Well, as far as that goes, most of these French cars are very good."

HOLDS FALSE TEETH TIGHT AS CEMENT

Plates can't possibly slip when you sprinkle on Dr. Wenzel's Powder. Largest seller in world—holds plate so tight they can't annoy you so comfortably as they actually feel and act like your own. Keeps mouth sanitary, breath pleasant—special comfort—cushion provides sensitive gums from getting sore. Small cost—any drugstore.

Old London Growing Fast

Every Year 150,000 People Added To Big Metropolis

Figures have been quoted by American statisticians to show that within so many years New York will be a larger city than London. Presumably that means Greater New York and Greater London because the working population of both cities, as is the case with all large centres, is, owing to vastly better transport services, living in the outer rings of the business areas.

New York is still about a million and a half behind, and it is going to catch up on London it will have to go some.

Lord Ashfield, the Englishman who once drove a street car in Detroit, and who is now the chairman of the London Passenger Transport Board, has to know exactly the traffic needs of Greater London. He told an audience the other day that London is attracting new industries at the rate of 1,000 per annum. London doesn't ask for them. They just want to locate in the midst of the largest assemblage of human beings in the world. By this means 750,000 people have been added to the population within the past decade, and there are 50,000 new houses built each year.

London is growing, therefore, at the rate of 150,000 people a year, virtually another big city is joined on London every twelve months.

At that rate plus the present million and a half advantage, New York is engaging in a hopeless chase if trying to overtake London.—St. Thomas Times-Journal.

Another Fad Diet

Bananas And Skim Milk Latest Idea For Reducing

One more is added to the list of fad diets for reducing. This one, consisting of bananas and skim milk, is reported to have the recommendation of a physician connected with the Johns Hopkins University. Bridge table conversations doubtless may be depended on to spread the new skim-milk-banana gospel.

"Both the bananas and milk deprived of cream are acknowledged to be excellent for reducing the fat," says the recommendation. It is also claiming that there is real danger in issuing for general application any prescription no matter how great the authority as endorsing it. What may be good for one person for accomplishing a particular change may be positively harmful to another seeking the same result.

Those who want to reduce should not take the advice of a friend even if that advice is passed on from a physician's directions based upon a recommendation of a friend. A careful physician might give entirely different advice to his patient's friend.

A Novel Clock

An amusing clock has been designed which at first sight resembles a picture of rather modernistic "flowers," a group of stems springing from the base, curve over slightly and sprays over the clock face so that the blossom topping each falls into the place usually occupied by the numerals. The clock hands are shaped like two slender leaves. This novel clock is said to be quite easy to read.

Library Of Small Books

A miniature library of 6,000 books, few of them larger than a postage stamp, has been collected by a Massachusetts man. The books include a complete Bible and all of Shakespeare's plays.

Sugar is being made out of wood in a large-scale factory finished this year at Mannheim, Germany. At present the sugar is fed to livestock.

According to astronomers, our earth appears blue to the people, if any, on Mars.

Agricultural Notes

Many Items Of Interest To The Western Farmer

Further tests in packing eggs for transit, have corroborated the original observations that packing eggs broad end up is superior to placing them broad ends down.

Canada and the United States supply the entire wheat and flour requirements of Cuba. No wheat is grown in Cuba, nor is any flour milled on the island from imported wheat.

The common oak and the sessile oak dominated the primeval forests of Ireland, remnants of the sessile oak being found to-day in the ancient forest of Shillelagh and in Cralloe wood near Limerick.

The popularity of the Dutch onion, exported from Holland to the various countries of Europe, is due in no small measure to the efficient grading established by the Netherlands government.

In the proposed regulations of the new Fruit and Honey Act, 1934, three grades (Nos. 1, 2, and 3) are recommended for honey for export out of Canada or from the province in which the honey was produced into any other province.

In spite of the fact that China does produce great quantities of wheat and could produce more, it does not seem likely that her domestic supplies can compete under international conditions with imported wheat.—Canadian Trade Commissioner in China.

Twelve inexpensive varieties of Iris recommended by the Horticultural Division of the Dominion Department of Agriculture for a small garden are Albert Victor, Aleazar, Flavaescens, Kynna, Lochgair, Mrs. Alan Gray, Opaka, Parc de Neuilly, Prosper Laugier, Quaker Lady, Sherwin Wright, and White Knight.

Based on official calculation of the per capita consumption of beef in England and Wales in 1929 at 70 pounds per annum—it has probably fallen below 65 pounds at the present time—the imports of Canadian cattle in 1933 gave the people of the United Kingdom a little over three days' supply of beef.

The Lily of the valley is very well known as a florist's flower but is too seldom seen in gardens in Canada. It is not suitable for a mixed border, but, as it will grow in shade, even under trees, there is generally some place where it can be planted.—Horticultural Division, Dominion Department of Agriculture.

When helping farmers to prevent outbreaks of insects in stored grain, officers of the Entomological Branch, Dominion Department of Agriculture, have found the following insects in farmers' granaries—saw-tooth grain beetle, rust-red flour beetle, flat grain beetle, rust-red grain beetle, foreign grain beetle, rice or black weevil, granary weevil, cadelle, meal weevil, moths, and two-banded flour beetle, and others.

The amount of Canadian honey exported has been increasing steadily from 1,744,871 pounds in 1929 to 2,800,770 pounds in 1933. Of the total exported in 1929, 1,213,229 pounds went to the United Kingdom, while in 1933, 2,213,899 pounds were sent to that market, indicating a growing market for Canadian honey in Great Britain.—The Agricultural Situation bulletin.

Nothing is definitely known as to the introduction of the potato into Canada. Derivatives, describing the life of the Acadia in 1609, speak of wheat, maple sugar, and fish, but makes no mention of potatoes. Benjamin Sulte, the Canadian historian, says that possibly potatoes were brought into Acadia by the Massachusetts troops in 1710. Pere Lafitau, missionary near Montreal, writes that in 1716 that the Iroquois and other Canadian Indians ate potatoes.

Another Old Bible

Second 1613 Edition Has Been Found In Toronto

A 1613 Bible, possibly the second in existence in Toronto, came to light when it turned up for sale in a Bay street bookshop. The Upper Canada Bible Society has one 1613 Bible, and it was thought to be in a class by itself. It contains the Order of Common Prayer, then the historic John Speed Biblical genealogy and map of the Holy Land and a series of woodcuts with explanatory notes. The owner can throw little light on the history of the book. It has been in his wife's family as long as family records can be traced.

Glue, plaster, and salt were used extensively by early embalmers.

The camel must be all right or nature wouldn't have backed him up.

How Acid Stomach Makes Itself Known to You

HERE ARE THE SIGNS: Nervousness, Frequent Headaches, Indigestion, Pains of Weakness, Loss of Appetite, Stomach Distress, Nausea, Sour Stomach, Auto-intoxication.

WHAT TO DO FOR IT:

TAKE—2 teaspoonfuls of the new Phillips' Milk of Magnesia in a glass of water every morning when you get up. Take another 2 teaspoonfuls 30 minutes after eating. And another 2 teaspoonfuls at bedtime. OR—Take the new Phillips' Milk of Magnesia Tablets—one tablet for each teaspoonful as directed above.

If you have Acid Stomach, don't worry about it. Follow the simple directions given above. This small dosage of Phillips' Milk of Magnesia acts at once to neutralize the acids that cause headache, stomach pains and other distress. Try it. You'll feel like a new person.

But—be careful you get genuine Phillips' Milk of Magnesia, or Phillips' Milk of Magnesia Tablets when you buy—25c and 50c sizes.

Also in Tablet Form. Each tiny tablet is the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

MADE IN CANADA

Phillips' Milk of Magnesia

Radio Is Still Wonderful

People Who Think Never Fail To Get Thrill

The public has heard so many wonderful broadcasts transmitted across oceans and continents that it has grown blasé and almost ceased to get a thrill out of radio nowadays. But those who still do a bit of thinking must be hard-shelled indeed if they fall sometimes to be moved.

In connection with the previous Byrd Antarctic expedition there was a remarkable incident. The New York Times radio editor was sitting in his home in Brooklyn talking to Byrd by means of short-wave sets.

In order to avoid interruption from the outside, the Byrd expedition receiver off the hook. The office wanted to call him up but couldn't. The office was also in communication with another member of the expedition, so they gave him a message to relay to their staff man a few miles away. They told the man in the Antarctic to tell their radio editor in Brooklyn to hang his receiver up as they wanted to talk to him. So the message to a man four or five miles away went very nearly to the South Pole and back to New York in a few seconds.

There are still some thrills left, even in radio.—St. Thomas Times-Journal.

Belgium Protects Frontier

The plan for fortification of Belgium's frontier, extending French defenses along the German line under way for the past 15 months is rapidly nearing completion. Several hundred concrete pill-boxes are being constructed all along the border.

Full Equipment

Burglars who entered a London house stole three kettles, a frying-pan, the dining-room gong, the fire-irons, a metal tea-tray and a child's money-box. One theory is that they are going to form a jazz band.

A new strain of wheat, which was claimed to resist extreme cold, was evolved in Sweden, but it was found to be susceptible to a disease to which the older types of wheat were resistant.

Plans Being Studied To Bring Assistance To The Dairy Industry

Ottawa. The dairy industry of Canada will be much concerned as to the possibilities for improvement through the operations of the marketing board and the efforts being made by the department of agriculture to show the farmers ways of improving their methods. The industry has been in a serious situation, as was evidenced in the milk probe of a year ago, and improvement since then has been but slight.

J. P. Singleton, dairy commissioner, is at present in Europe. He attended a dairy conference in Italy, and after visiting some of the dairy-producing countries such as Denmark and Holland, will study the marketing situation in England. The falling off in production of cheese in Canada has been giving considerable alarm.

Authorities here regard the best methods of using the milk from Canada's countless dairy cows to be first to supply the domestic requirements such as raw milk, ice cream, butter, and what is left over should be made into cheese and condensed milk for the British market.

The difficulty is to control the butter production so it will be sufficient for domestic requirements and yet not develop a marketing board which would break prices in Canada. The plan under the marketing act would be to make provision, when a butter surplus did develop, to ship this surplus to an outside market, and any loss entailed as compared with local prices would be met out of the funds of the marketing board. Alongside this would be provided greater facilities for the storing and ageing of Canadian cheese with the idea of making it as profitable to produce cheese as butter.

Accepts Invitation

St. Lawrence Suite To Be Played By Toronto Symphony Orchestra

Toronto. Wilfred C. James, manager of the Toronto Symphony Orchestra, announced that Percival Price, Ottawa conductor, has accepted an invitation that the orchestra play his "St. Lawrence" suite as the opening presentation of the 1934-35 season.

The invitation, Mr. James said, was made by Dr. Ernest MacMillan, conductor of the orchestra. Price's "St. Lawrence" won him a Pulitzer scholarship valued at \$1,500. It was rejected by the University of Toronto when Price submitted it as the means of obtaining his doctorate of music. Dr. MacMillan was a member of the committee that rejected the work.

Crude Oil Freight Rates

Matter To Be Considered By Board Of Railway Commissioners

Ottawa. Proposed increases in freight rates on crude oil from southwestern United States to refineries in Western Canada will be considered by the board of railway commissioners in a series of hearings in Western Canada, commencing in Regina, May 22.

Afterward hearings will be in Edmonton, May 25; Vancouver, May 28; Calgary, June 1, and Winnipeg, June 5. Dr. S. J. McLean, assistant chief commissioner, and J. A. Stoneman, commissioner, will make the western trip.

World Wheat Advisory Committee Agrees On Minimum Price Basis

London. The world wheat advisory commission agreed on a new left to work out the F.O.B. price in and clarified form of a minimum wheat price basis. The commission contemplates an increase in wheat prices up to 10 per cent. over the present level. The plan is not to attempt any sudden jump but effect gradual increases (from zero to 10 per cent.)

Under the scheme as drafted at Rome difficulty arose as between quoting on the basis of C.I.F. and F.O.B. prices the first being wheat laid down, cost, insurance and freight paid; the second wheat arriving free on board. As now revised and adopted by the conference, the minimum export price when worked out will be based in terms of sterling, on the C.I.F. basis.

U.S. Crop Damaged

Prolonged Drouth And Dust Storms Results In Wheat Price Advance

Chicago. Soaring wheat prices accompanied news of increasingly severe damage to United States crops inflicted by prolonged drouth and raging dust storms.

Fields parched by days of unabated heat and lack of moisture, in wheat growing areas, particularly in the northwest, were reflected on the Chicago board of trade by spectacular increases in prices of grains. Crop experts agreed damage from heat, dry soil and wind that bared roots in some places and buried plants in others worked together to shorten the wheat crop. Reports said oats suffered severely and that the hay crop and grazing lands have been so much affected by the drouth a serious feed shortage was threatened.

Literally thousands of tons of top soil, pulverized by the intense heat, were carried on a high wind blowing from the Dakotas and Minnesota southeast as far as the lower lake region.

So serious was the water shortage that in some of the most affected regions municipal embargoes were established on drinking water, with penalties hurriedly attached for wastefulness.

Elements reared through the collapse of pasture lands under the sun to feed from the mows, were confronted with a feed shortage that could be relieved only partially through substitute crops, experts said. Soy beans, which can be effectively planted in the middle of June in some sections were looked upon as a principal substitute.

The Dakotas, Minnesota, Illinois, Nebraska, Indiana and Ohio appeared, from experts' reports, the most seriously affected.

Student Wins Gold Medal

Young Russian Takes High Honors At University Of British Columbia

Vancouver. A young Russian student, George Michael Volkoff, who first came to Vancouver in 1924, won the governor-general's gold medal, highest award for members of the graduating class at the University of British Columbia, it was announced. Volkoff, aged 24, had an average of 98 per cent. in all subjects. He had 100 per cent. in three subjects and took first class honors in physics and mathematics.

Volkoff was born in Harbin, Manchuria, where his father is professor in the Polytechnical Institute. He attended Lord Roberts school here and returned to Manchuria for several years before entering the university.

He has had his class every year and intends working for his master's degree here next session.

To Prevent Warfare

Calgary. A resolution asking government control of key minerals as a method of war prevention, endorsed by the Vancouver Women's Canadian Club and the Calgary Business and Professional Women's Club, will be sent to the League of Nations Society, at Ottawa, for further action.

Released On Bail

Samuel Inault At Liberty On Bonds Of \$250,000

Chicago. Samuel Inault, Sr., was at liberty on \$250,000 bail.

Released from Cook county jail by friends who put up that amount of money, the departed utilities czar went at once to a guest room in St. Luke's hospital.

"I've convinced him," said his son, Samuel, Jr., "that he ought to rest there. These last three days (Inault has been in jail) or court three days and three nights) have been a strain on him."

Inault will rest in the hospital without cost. The superintendent said this was in repayment of Inault's contributions to the institution when he was the city's wealthiest man. To loosen the federal government's grip on Inault took nearly a full day. The rescue forces, led by his son, Samuel, Jr., and Attorney Floyd E. Thompson, were ready when court opened with bail—a fortune in real estate, securities and cash—to post a guarantee that when Inault's cases came to trial, he would be on hand.

Inault's son said, "dozens of father's friends offered us property."

Who pledged the property to get the \$200,000 surety bond was not revealed. In the state court, however, Inault's second bond—one of \$50,000—was furnished chiefly by strangers.

Heavy Damage From Flood

Peace River Has Risen Eighty Feet Above Normal

Fort Chipewyan, Alta.—Sweeping buildings and trees in a mad rush, waters of the Peace River continued their record-breaking rampage as they rose 80 feet above the normal summer level at a point 100 miles west of here, reports reaching this city said. Never before in white man's knowledge or Indian's memory has the river reached such terrific flood proportions.

No lives were lost, but property damage is heavy. The flood meant the loss of the important spring muskrat catch to trappers who depend largely upon this for summer livelihood. Trees over 100 years old were swept away like matchwood as the waters struck after an ice jam of huge size gave way. Fortunately the area is sparsely populated, for had the flood been in the average riverside agricultural community, nothing could have saved those in its path.

Discuss War Debts

President Roosevelt Has Talk With Belgian And French Ambassadors

Washington. A re-statement of the United States' attitude toward war debts came from President Roosevelt and shortly thereafter the ambassadors of two nations that are in default—Belgium and France—called at the state department to discuss the matter.

The position outlined by the president called for an insistence upon payment by the debtor nations, but a willingness to talk over their individual problems separately and give consideration, either to proposals for token payments or for new terms of settlement.

Host To Siamese Royalty

London.—The king and queen of Siam had luncheon at the House of Commons as guests of Captain Victor Cazalet, Conservative M.P., who was a public school colleague of King Prajadhipok at famous old Eton. It was believed to be the first occasion on which a ruling monarch had taken a meal in the precincts of the house.

CAUGHT AGAIN!

Undaunted by failure of two previous attempts to enter the United States, Hugh J. McLeod, Scottish war veteran, tried again. This time as a stowaway on the Aquilana. He is shown at Ellis Island, after he had been captured. He wants to reach his wife in San Francisco.

Forest Fires In Europe

Paris.—Forest fires, an aftermath of the serious drought gripping many parts of Europe, caused widespread damage and loss of life in three continental countries.

In Poland, flames destroyed two villages in Silesia and Malorka. Three children lost their lives and many were injured as 400 houses were burned. Fires starting in the dense forests of Roumania crept into the city of Campulino-Muscel, and the towns of Ruzsa and Silistra, taking a heavy property toll.

Strong winds fanned the flames at Campulino-Muscel and more than 60 houses were destroyed. Damage was placed at \$500,000. Shortage of water hampered attempts to curb the blazes.

Forest fires that laid waste 5,500 acres of pines and threatened the valuable turpentine region southwest of Bordeaux, France, were believed to be under control. A 15-mile area near Belin and the small district of Archelon was swept by the flames.

Criticizes Wheat Conference

Sir Herbert Robson Voices Views Of British Traders

London.—An attack on the work of the wheat conference by one of the British delegates, Sir Herbert Robson, was construed as simply an indication of the attitude of the grain traders.

Sir Herbert, president of the London Corn Trade Association, voiced the views of the Liverpool and London wheat traders when he decried "government interference" with the wheat trade and declared:

"I must say I view with deep concern the increasing interference of governments with international trade."

He criticized the current conference and a recent meeting of the commission in Rome "for concentrating on price and quota schemes rather than the production problem."

Commands Cape Breton Forces

Sydney, N.S.—Inspector John McIntosh, of the Royal Canadian Mounted Police, just returned after spending six months in Regina in training, has resumed command of the Cape Breton forces.

PRINCIPALS IN STRANGE CONTROVERSY

The Duke of Athlone, who ran a sweepstakes last year for charity and was fined by a London court, recently figured in the news when he related the coincidence of being fined £25 after being told by a police inspector to plead guilty and the fine would be £25. Sir Thomas Inskip, K.C., British Solicitor General (right) denied the Duke's statement, at which the Duke came back steadily adhering to his previous statement. Hence a first-class controversy ensues.

Amendments Made To Provisions Of The Marketing Bill

Ottawa. — Amendments designed to clarify and make more definite the provisions of the marketing bill were tabled in the House of Commons by Hon. Robert Weir, minister of agriculture. Some of the changes were made as the result of representations from farming organizations and suggestions in the house. Others were from the justice department to make the clauses conform with the jurisdiction of the Dominion and the provinces. The principle of the bill has not been changed, it was contended in official circles.

Some question was raised as to whether the bill as originally drafted did not empower the Dominion marketing boards to draw money out of consolidated revenue without an order-in-council. The section has been re-worded to leave no doubt that an order-in-council must be passed.

The bill provides for the regulation of natural products and the amendment particularizes the commodities which may be brought under the marketing board.

While more explicit than the first definition of what were natural products it applies as in the original to products of the forest, sea, lake or river in addition to farm products and any article of food or drink derived from these products, either wholly or partly manufactured.

Provision is made to give the Dominion board and the provincial and local boards both Dominion and provincial jurisdiction. For example a provincial act could not give provincial boards power to levy indirect taxation so the federal bill

confers this power on the provincial bodies.

Reversely, the Dominion and local boards will be empowered through provincial enabling legislation to regulate marketing within a province, since the Dominion parliament has no jurisdiction to grant such power. The plan is that all boards will have both federal and provincial legislative backing.

Should any section of the bill still be found to be ultra vires, provision is made that its failure will not endanger the legislation as a whole.

The provision in regard to the initiation of any scheme to regulate the marketing of a commodity are also clarified. A group of producers may appeal to the minister to have their products, such as apples, dairy products and the like, put under a scheme.

The minister, on the advice of the Dominion board, will decide whether the petition should be entertained. The petition will probably set forth whether a poll of the producers should be required before a board is set up to regulate that commodity.

The minister would ultimately decide what majority of producers would be necessary before a board for any product would be set up. The bill does not specify what proportion of all the producers must vote for a scheme before it would be inaugurated, although the feeling in government circles is that at least 75 per cent. of the producers should vote for it before it would be recommended.

Dust Storms In East

Storm Of Unusual Violence Is Reported From Detroit

Detroit, Mich.—A dust storm, raging throughout the west and southwest, got out of its path and invaded Detroit. Other portions of the state suffered also from the clouds of dust and sand, driven along by high winds.

The storm, of unusual violence, clouding the air of the city, is unique this far east. At the weather bureau the latest news is that the long drouth were blamed for the phenomenon.

Other portions of the state indicating the widespread nature of the freak storm—reported similar showers of sand.

Advice To Nurses

Should Take Up Work In Smaller Places

Montreal.—Nurses were advised to take up residence and practice in smaller places by Miss Elizabeth Smellie, chief superintendent for Canada of the Victorian Order of Nurses, at a dinner of the Alumnae Association of the Royal Victoria hospital here.

Schemes submitted to the legislatures of British Columbia and Alberta appeared to indicate the coming of public responsibility in health matters, said Miss Smellie, and she wondered whether in future there would be two divisions, one for medical care, including hospitals, and the other for preventive work.

Great Britain Expects A Final Solution Of War Debt Problems

London.—Strong hints were heard here that Great Britain expects a last-minute solution of the United States war debt problem as a result of decisions by President Franklin D. Roosevelt.

Belief was expressed that Mr. Roosevelt, by emphasizing that Washington stands for collection of the obligations due June 15 but will grant hearings to nations seeking reduced payments, paved the way for moves of some sort that would permit a new debt arrangement.

"Great Britain," one authority said, "is certain that some sort of amicable adjustment will be made before June 15. Britain is eager to discuss any proposal Mr. Roosevelt may have to offer."

Britain maintains her position is different from that of any other debtor. She points out she has as much owing her as she owes the United States and has been willing for years to drop her own collections if the United States will do the same. Official advisers, it was said, had not been received here from Washington regarding President Roosevelt's latest statements. Any decisions will have to be studied at some length when official notices are received. It was pointed out.

A token payment, some circles said, may be sent to the United States in June, regardless of whether the negotiations looking toward a complete settlement have been started by that time.

The London press was rather unanimous in declaring there was little chance of the United States ever collecting all the money owing after in such a case would be to her. Payment of debts is one United States'.

thing, but actual transfers of those payments without completely upsetting money equilibrium is another problem.

The Daily Telegraph succinctly summarized this when it said, "The United States will not take value in goods and the perverse laws of transfer forbid continued gold payments without ruinous results to commodity prices"—which President Roosevelt is striving to raise.

So far as actual debt negotiations are concerned, there seemed no indication of any change in the British attitude that following her own representations on previous occasions the first move towards revision must come from the United States. The Telegraph also commented: "The condition precedent to just settlement is not a peremptory summons to a 'means test' but a friendly invitation to a conference of equals."

"The congressional horizon is far too restricted when it rejects from its purview, it was said, the debts and debts which other nations owe Great Britain," The Telegraph added. "And our share of reparations is about as recoverable as the outstanding debts of the Pharaohs."

The Times declared: "The difficulty is not that nations in distress are not able to pay what they owe, but that the traditional policy of the United States makes receipt of payment impossible." An attempt to sell millions of sterling credits for dollar credits, or gold, would immediately involve a stalling down and the dollar up, it pointed out. The chief ever collected all the money owing after in such a case would be to her. Payment of debts is one United States'.

NOTES AND COMMENTS

SPRINGTIME in the Rockies and the merry month of May bring sunshine and flowers. The woods are full of life, if one has eyes and ears to see and observe fully the myriad activities of mother Nature. Just as active as the millions of a big city, who in a comparative sense are just so many ants scuttling around and in and out of their own anthill, so are the woods full of moving and hurrying creatures and insects intent on their own particular piece of work. Every few steps this activity is evident, while on a more spectacular scale the creeks and streams and the trees proclaim that this is the season of new life, of casting off the old and on with the new. You can find plenty of life in the woods, even if you walk alone. Above all it is life which inspires, and makes mere man realize the indescribable grandeur, system and wonder of the ever changing forces of Nature. In the mountains we have many privileges which the dwellers on the dust-ridden plains are denied.

MAN is always groping for new ideas, new methods. The desire for information on the Douglas credit system, though difficult to demonstrate in a practical way, interests many, even to the extent of the Alberta legislature inviting Major Douglas to address them during the session just closed. An ardent apostle of the system is William Aberhart, whose voice booms over the radio as the dean of the Prophetic Bible Institute in Calgary. He has a number of disciples who are attempting to enlighten people on this absorbing topic, three of whom addressed a meeting in Coleman. As the Bible says: "Seek and ye shall find," so many are seeking to day for panaceas to lighten their burdens.

WHATEVER systems may be devised, the basic necessity of working in order to survive will not be downed. Shorter hours, improved credit systems, humanitarian methods of helping the underdog are commendable, yet the natural law will maintain its supremacy over all man-made laws. Man's higher intelligence may enable him to live with less drudgery and on a much higher plane than his forefathers, but every new privilege brings its added responsibility. Over-ambitious individuals at times rear a structure of optimism, incurring debts which they have not the ability to pay. Big financiers or builders of vast utility systems, such as Samuel Insull and Ivan Krueger, were regarded as wizards in their fields of activity. Millions on a lesser scale have similar experiences, yet the result of biting off more than you can chew results in financial disaster, not only damaging to the leaders, but bringing heavy loss to creditors and investors who followed their lead.

MEN who fail are not to be wholly condemned. Errors of judgment are made by all. Some in their emotional enthusiasm lose sight of bedrock principles and castles in the air are built which do not stand the stress of financial storms. Insull rendered a public service in the creation of his vast network of cheap power, but his financing methods were unsound. To regain control of the vast system he created he brought upon himself disaster and loss to thousands of smaller investors.

CAPTAIN Thierstein, financial representative in Alberta for the Salvation Army, and a former officer of Coleman post, is in the Pass on the annual campaign in which the objective is \$30,000 for the province. Accompanying him is the Young People's Sergeant Major F. A. Fair.

IT is three years since the Army withdrew its officers from Coleman, and many who recognized the good influence of its local and world wide work regretted the cessation of its local activities. The Army, as with all other organizations, has experienced a loss of support during the depression, and it was lack of officers which caused several posts to be closed. Many thought it was lack of support in the Pass towns which decided the closing of Coleman post, but Captain Thierstein states it was not, and there is a possibility of re-opening if more officers are available for this province. The familiar uniform and the sound of the drum, with the fearless preaching of the Gospel on street corners by Army officers may cause many a sinner to turn to a new life, for its influence touches many whom for various reasons never enter a church. The blood-red banner of the Army continues to float over the world. In our own province it has nine institutions which last year cared for 225 unmarried people, 250 old people and 120 children. Not from rich people but from 90 per cent of people whose incomes range downward from \$50 per week comes the bulk of the Army's support, states Commissioner James Hay, commander of the Salvation Army in Canada.

PREMIER BENNETT very emphatically showed that reflections could not be cast at members of his government, by manufacturers or their representatives. One gentleman of the enormous profit companies had to eat humble pie and make a public apology, not only by letter but by being recalled before the committee to whom he made sinister references. Think before you speak is a wise procedure.

Who Should Be taxed

The Clinton News-Record hits the nail on the head when it advocates the taxing of the man who lets his property go to wreck rather than the man who keeps his property in good condition. As it is at present, the man who employs the painter and the carpenter to make his place more attractive, and who thus improves the appearance of the whole neighborhood, is penalized by increased taxation, while the man who allows his property to become an eyesore, and thus decreases the value of his neighbors' property is encouraged in his neglect by reduced taxation. Some day the people will wake up and demand a radical change in the assessment law and Revision Courts, as has been the case in Whitchy on several occasions, will absolutely refuse to help a man who lets his property run down.—Whitchy Gazette.

Local News

Mr. and Mrs. C.R. Rogers motored to Lethbridge on Sunday where they were the guests of Mr. and Mrs. A. Malcolm.

Sam McDonald of Roseville is visiting at the Grand Union for a few days.

Miss Grace Bratton of Spring Point is the guest of Mr. and Mrs. T. Holstead.

J. Emmerson, president of the football club, urges your support for the football club dance on May 24 in the Community hall.

The Rodeo announced for May 22-23-24 has been postponed. New dates will be announced as soon as arrangements are made.

There will be a circle tea and pantry table at the home of Mrs. W. Milley on Tuesday afternoon, May 22, from 3 to 6 o'clock. Everyone welcome.

Mr. and Mrs. A. Brown and Mrs. J. Richards journeyed to Edmonton at the beginning of the week to witness the graduation exercises held on Tuesday in the Alberta University at which Gwen Brown will receive her diploma as a Bachelor of Arts.

Entertainments have been held at the homes of Mrs. Dibble and Mrs. B. Westworth in honor of Mrs. S. B. Ryan who along with her mother, Mrs. Kilgannon, will leave Thursday to spend a three months vacation the guests of Mrs. Kilgannon's daughter at Columbus, Ohio.

E. L. Dodge, until recently road foreman for the Alberta government, and Harold Reid, left to day for northern British Columbia to work for a mining company. Two Bros. of Calgary. The location is beyond the ordinary means of transportation, and part of their journey in will be by plane.

The Ambassadors Orchestra from Kamloops, were unable to fill their engagement here on Monday. A substitute orchestra played a few dances, but as there was only a small number turned out, the dance was cancelled. Clifford Kidd, manager of the Ambassadors, states he was unable to bring them here owing to sickness of two of the players, but hopes to bring them through later in the year.

Printed matter of all kinds should be ordered through The Journal office. Counter check books printed to order at factory prices. Typewriter ribbons and carbon paper.

WORLD HAPPENINGS BRIEFLY TOLD

The N.R.A. has decided to impose a code upon the telegraph industry in the United States.

Capt. James Mollison has entered in the England-Australia air race. He will fly with his wife, the former Amy Johnson.

Testing the Mackenzie river inland water route to the north, the Hudson's Bay Company will ship 500 tons of supplies from Edmonton this season for its posts in the western Arctic region.

Speaker Henry Rainey said he understood President Roosevelt intended to make a war debt settlement with Finland, which is not in default, and then recommend a similar agreement with other nations.

Canada's membership in the League of Nations has cost her \$3,260,574.98 in her contributions to the league since 1919, according to an answer given in the House of Commons.

Amateur whale hunting under the guidance of experts is to be one of the vacation attractions in Manitoba's seaport this year, J. F. S. Fletcher, chairman of the tourist committee of the Churchill Board of Trade, announces.

The government announced that the King and Queen hope to go to Glasgow at the end of September to launch the new giant Cunard liner "834". Her Majesty, the announcement said, will perform the actual ceremony of launching the vessel.

Ernest S. Penland, student in the school of graduate studies at Toronto University, has been awarded a University of Alberta research scholarship valued at \$600. He will leave for Alberta in September to conduct investigation into rabbit periodicity.

Horses from Alberta ranges may soon gallop about the green pastures of the Fiji Islands. Dealers in the Cardston district, if present negotiations are successful, expect to ship a boatload of light draft horses to the Fiji Islands via Vancouver shortly.

Has Attracted Many

Record Crowds See Codex Sinaiticus At British Museum

Record crowds have been attracted to the British Museum in London to see the Codex Sinaiticus, the 5000-000 fourth-century manuscript Bible bought from the Soviet government. One day's attendance was 7,041, and from the opening to closing times there has been a line waiting to get into the building. Response to the public appeal for \$250,000 to complete the purchase of the work has been unusually generous. More than \$200,000 was contributed in a few days and the entire amount is expected to be raised within three months. The government will supply the other \$250,000. The museum officials have written to the Soviet government regarding a fragment of the Codex, about three inches long and one inch wide, which is missing. There is no question of it having been lost while the Bible was on the way from Russia, they say.

Wise Spending

Wise spending is the only thing that keeps business going. Niggardly economy has no place in the world's progress. The great trouble with us these days, as we see it, is that in time of plenty we did too much foolish spending. Instead of obligating ourselves for debts that meant investment, we launched an orgy of spending for spending only, in which business was not considered and pleasure only thought of.

Worse Than Tower Of Babel

The Tower of Babel was tongue-tied in comparison to the little town of Chatelet-en-Gatnais, France, of 5,500 inhabitants, eighty miles from Paris. There are 2,796 foreigners residing there, and the town, all told, speaks twenty-two languages. Market day, therefore is complicated.

A comet seen in 1843 had a tail 150,000,000 miles long.

DOCTORING YOUR DAIRY HERD

Cows aren't machines. They can get sick or hurt. But Minard's Liniment makes it easy to care for their ills. Mrs. Thos. Bulmer of Lardo, B.C., found one of her herd with a lump in her udder. "I rubbed it with Minard's Liniment," she says, "and it soon got better."

Minard's is best for Cuts, Bruises, Colic, Distemper, etc., and equally good in stable or in house. Well named "King of Pain."

BY BECK! JIM, YOU'RE RIGHT!

—AND AS SURE AS I'M STANDING HERE, RIGHT ON THE PRESIDENT'S DESK WAS A PACKAGE OF OGDEN'S!

OGDEN'S CUT PLUG

Gardening

Avoid Planting Seeds Too Deep And Too Close Together

The most common mistakes in gardening are sowing seed too deep and allowing plants to grow too close together. As a general rule, three times the diameter of the seed is the proper depth to sow. This means merely pressing things like lettuce, turnips, and radish into the soil, but covering the larger seeds such as corn, beans, peas, and beets to a depth of about an inch. With flowers, the finer sorts like Alyssum, and Poppies should be sown on top of the ground and barely pressed in. Some of these very fine seeds are best mixed thoroughly with a little dry sand and the mixture sown to avoid sowing too thick. Bulb and tuberous such as gladioli and dahlias are put in from six to eight inches. Thinning is just as important. With flowers the rule to follow is to allow half as much space between as the plants are high. In every seed catalogue the height of the mature plant is given. Suppose one is working with the ordinary type Zinnia. When fully grown this will be a bushy plant about 18 inches high and almost the same across, therefore it should be thinned to stand about ten inches apart. Not only will such thinning result in stouter plants but they will also be more bushy and symmetrical. Even the quick growing leaf lettuce and radish should be thinned, though an inch between plants will be enough. Beans, peas and corn being big seeds are sown at the proper distance, that is at least three inches apart and in the case of corn in rows, six inches. Two inches apart will be enough for beets and carrots. Of course this does not allow full development but when the plants begin to fill up the space, half of them should be taken out and sown elsewhere.

Gardening is very inexpensive in the way of necessary equipment. With a rake, a small hoe and a spade one can accomplish wonders, though if the place is a large one, it is advisable to have a few more tools. At this time of year a string and a few stakes for making straight rows will come in handy. One of the small garden tractors which cultivates, seeds, and even plows will take the place of a horse. Later on when it is necessary to cultivate once a week, one can use the tractor to mow and secondly to destroy weeds, a five-toothed hand cultivator costing less than two dollars will save hours of time with the hoe. Of the latter implement there are several sizes available. Some are pushed ahead and being very sharp they make a row of weeds beneath trees and close to rows which are usually hard placed to reach with the ordinary hoe. A digging fork in ordinary garden soil is to be preferred to a spade. For the flower garden, a trowel and hand digging fork about ten inches long will be found useful.

Tender vegetables must be grown quickly. Especially with such things as radishes, carrots and beets, is slow growing disastrous as the roots become woody and filled with objectionable fibres. But this rule also applies to those things used for salads. On this account it is important to push growth along with frequent cultivation, which in addition to checking weeds also conserves moisture. Cultivation alone will often keep the vegetables going through a dry spell but of course they will have to have an hour or two with the hose at this time, or prove beneficial. Where the supply of water is not so convenient as it might be it is a good plan, in laying out the garden, to plant those things, most in need of extra moisture, such as melons, watermelon, etc., closest to the pump. Fertilizer, is another way of hurrying growth and therefore assuring vegetables of the highest quality.

While \$14,240,000 in gold was shipped from Shanghai, China, last year, practically none was received there. To a lot of people the best summer holiday of all would be a job. Fact is the art of saying nothing when there is nothing to be said.

700

STUNNING DRESS FOR MATRONS AND YOUNGER WOMEN WHO FEEL THEY COULD WELL SUPPORT A FEW SLIMMING LINES

To-day's model lends itself most admirably to the spring crepe prints in navy and white, brown and white and in green tones. The yoke at the front of the bodice is slimming the way it ends in a tied scarf. The slim skirt cut with a length-giving panel at the front, tapers gracefully in its softly slightly flared fullness.

Another interesting scheme is navy blue crepe silk with the deep back pointed yoke of the bodice and the front yoke of crisp white embroidered organdy.

Style No. 700 is designed for sizes 36, 38, 40, 42, 44, 46 and 48 inches bust.

Size 36 requires 3 1/2 yards of 30-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Town

Must Learn To Swim

All French officers will have to sink or swim in the future. Marshal Petain, minister of war and venerable defender of Verdun, has issued an order that swimming will be part of the entrance examinations to all French military schools from now on. It is the marshal's intention eventually to equip all military camps with swimming pools, where soldiers will be obliged to learn how to keep afloat.

Used His Spare Time

Paul Graham, a soldier who has been a patient in Fitzsimmons General hospital at Denver, Colorado, for eighteen months, has a complete miniature house to show for his little hours. He built it entirely of burnt matches, using 2,800 of them. Fellow patients aided him in getting the used matches, from which he trimmed the burnt ends before working them into the tiny structure.

Little Journeys In Science

(By Gordon H. Guest, M.A.)

METALS

Interesting examples of the practical applications of science to everyday life may be found in the production and use of metals. The metal known to the ancients was gold, silver, copper, lead, tin, and mercury. Gold and copper have been used since prehistoric times, and it is likely that these were the first metals used by man. Until the middle of the 18th century the only metals in common use were copper, iron, tin, zinc, and the mixtures or alloys called bronze (copper and tin) and brass (copper and zinc). Steel is simply a form of iron containing small amounts of carbon and other substances.

Aluminum was discovered in 1825, and was at first very rare and valuable. It is a constituent of clay. In 1854 a method was devised by which it could be manufactured by the French chemist Deville. In 1886, C. M. Hall, a university student, invented a new process depending on the use of electricity. By means of this new method aluminum was produced cheaply in large quantities, and the metal is now used extensively. Science has not yet discovered a method of extracting aluminum from clay, and most of it is obtained from the mineral bauxite.

Magnesium, another metal which was not known until early in the 19th century. This metal is also obtained by an electrical method. An alloy of magnesium with aluminum known as magnalium has great strength and is very light. This alloy is about twice as heavy as an equal volume of water, whereas steel is about eight times as heavy as water. Alloys of this kind are used in air ships and motor construction.

Many valuable metals are produced by mixing, or alloying, simple metals. For centuries man has used bronze and brass, which are alloys. Printers' type consisting of lead, antimony and tin, in an alloy which has the property of expanding slightly when the molten metal hardens, so that sharp impressions of the mould are obtained. Stainless steel is an alloy of iron with chromium and nickel, and many special steels contain iron alloyed with metals such as tungsten, molybdenum, vanadium, and cobalt. These special steels are used in the manufacture of chains, lathe tools, parts of motor cars, railway tracks and the steel for bridges.

Blind Man Expert Golfer

Helped Win Match On Links In Cornwall, England

Playing with three others with perfect sight, a blind man helped win a golf match on the St. Austell links in Cornwall, England, recently. The golfers played by the aid of Gerald Lowry, the first British officer to lose his sight during the World War, was partnered by Sir Wilson Hungerford, and they defeated Sir George Wilkinson and Lieut.-Commander E. R. Gibson by one hole. Sir Wilson, after the round, said he was amazed at his partner's skill. "I placed the ball on the tee for Captain Lowry," he said, "and then guided his club to within an inch or so of the ball. Then he swept back his club along the ground and, with a half-swing, came down on the ball with all his might. Often he drove the ball 130 yards. With his iron in the rough his skill was surprising."

No Argument

After the locomotive had smashed a flivver at the crossing, a flapper rode from the wreckage unharmed and powdered her nose. The engineer and others gathered around. "Why in the world didn't you stop when you saw the engine coming?" asked the engineer.

The flapper was indignant. "Sir Wilson, after the round, said he was amazed at his partner's skill. 'I placed the ball on the tee for Captain Lowry,' he said, 'and then guided his club to within an inch or so of the ball. Then he swept back his club along the ground and, with a half-swing, came down on the ball with all his might. Often he drove the ball 130 yards. With his iron in the rough his skill was surprising.'"

OFF COLOUR? HOW IS YOUR LIVER?

Wake up your Liver! —Without Calomel

Your liver's a very small organ, but it certainly can put your digestive and eliminative system out of action. If refused to pour out its daily two pounds of liquid bile into your bowels, you will completely corrupt such a condition by taking salts, oil, mineral water, laxative candy, etc., or worse, or rougher than these. You moved your bowels they're through—and you're better.

Cartier's Little Liver Pills will soon bring back Sir Wilson, after the round, said he was amazed at his partner's skill. "I placed the ball on the tee for Captain Lowry," he said, "and then guided his club to within an inch or so of the ball. Then he swept back his club along the ground and, with a half-swing, came down on the ball with all his might. Often he drove the ball 130 yards. With his iron in the rough his skill was surprising."

SUNDAY SCHOOL LESSON

MAY 20

THE FUTURE OF THE KINGDOM

Golden Text: "The kingdom of the world is become the kingdom of our Lord, and of his Christ: and he shall reign for ever and ever." The parables of the Kingdom, 24:1-25:30. Devotional Reading: Revelation 21:1-7.

Explanations And Comments

The Parable of the Wise and Foolish Virgins, 25:1-13. The Kingdom of Heaven Jesus likened to ten virgins who went forth with their lamps to meet the bridegroom. Five virgins were wise (prudent) and carried an extra supply of oil in their oil vessels, but five were foolish (imprudent) and took no extra supply. The bridegroom tarried and all slept. There is no hint of reproach in this statement. The bridegroom might tarry a long time. Midnight came and the approach of the bridegroom was announced. All the virgins arose and trimmed their lamps preparatory to going forth to meet him. The foolish ones found their lamps going out, and begged the wise ones to share with them their oil. But the wise ones refused, lest there might be enough oil for them, and consoled them to go out and buy oil. In the application of the parable the thought is that the righteousness of one cannot avail for another.

While the foolish virgins went forth to buy their oil the bridegroom came. Those who were ready went in with him to the marriage feast, and the door was shut. What does the coming of the bridegroom mean? "The coming of Christ is certainly not a time when he draws near in the world, for he is in the world always," Phillips Brooks explains. "It must be, then, some time or times in the world, when his presence becomes manifest, his grace becomes manifest, his kingdom comes, the coming of the Spirit at man's conversion, which is not by a little while, which cultivates the life of watchfulness within us, not to know when Christ is coming to judge the world, when he is coming to call us to himself by death, when he is coming by some great experience to our souls."

When the foolish virgins arrived with the needed oil and begged to be admitted to the feast, the bridegroom answered, "Verily I say unto you, I know you not."

"Watch, therefore," Jesus added, "for ye know not the day nor the hour!" Be not unprepared.

Recipes For This Week

(By Betty Barclay)

ORANGE NUTMEAD FOR SANDWICHES

2 cups sifted flour
4 teaspoons baking powder
1 teaspoon salt
1/2 cup sugar
1/2 cup shortening
1/2 cup finely chopped nuts
1 egg
Orange juice

1 tablespoon orange marmalade
Sift dry ingredients together. Cut in shortening. Add nuts. Beat egg; pour into measuring cup; add enough orange juice to make 1/2 cup. Combine with dry ingredients and add marmalade. Knead a few seconds on slightly floured board. Let stand in refrigerator or cool place 1/2 hour. Then bake in loaf pan in moderate oven (350 degrees F.) till done—about 45 minutes.

Note: A little more orange juice will be needed with some flour to make the dough soft.

BAKED CHOCOLATE CUSTARD

2 squares unsweetened chocolate
4 cups milk
4 eggs, slightly beaten
1/2 cup sugar
1/2 teaspoon salt
1 teaspoon vanilla

Add chocolate to milk and heat in double boiler. When chocolate is melted, beat with rotary egg beater until blended. Combine eggs, sugar, and salt; add chocolate mixture gradually, stirring until sugar is dissolved. Add vanilla and pour into custard cups. Place in pan of hot water and bake in slow oven (325 degrees F.) 1 hour, or until knife inserted comes out clean. (Water in pan should not reach boiling temperature). Chill. Unmold and serve with cream, if desired. Serves 8.

Canadian Drama For London

Suggestion Is Made By Adjutant That Some Dominion Company Should Visit Old Land

The hope that in the near future one of the Canadian amateur dramatic groups which has been victorious in the Dominion drama festival, may be seen in London, was expressed by J. T. Oden, veteran critic and essayist, who judged the festival this year.

If a Canadian company were successful in London it would receive "as it were, a universal hallmark," he added. He was aware that the main question involved was one of finance, but this might be solved if Great Britain and Canada were both willing to assist. If, for instance, the British Drama League would invite a Canadian entry to play in the London festival, there might be some way in which necessary financial arrangements could be made.

One important suggestion which he made was that there should be a special committee to select the plays for presentation at the festival next year. He referred to the "spell of gloom" which surrounded some of the performances at the festival just concluded.

"Therefore," suggested Mr. Grein, "I think that towards the next festival there should be established a small special committee to select plays so that humor may become a peer of gloom."

Is Chief Scout

Fres. Beatty Of C.F.R. Heads Boy Scout Association

On nomination of the governing council, chief scout for Canada, E. W. Beatty was re-elected president of the Boy Scouts Association at the annual meeting held at Ottawa. Other Dominion officers re-elected were: Hon. Dominion Counsel, Dr. F. H. Glaberson; Hon. Dominion secretary, Gerald H. Brown; chairman finance committee, Jackson Dadds; Hon. Dominion treasurer, Major W. R. Croighton, Ottawa.

Greetings from the meeting were sent to Lord Baden-Powell, world chief scout, and to Earl Willington, Lord Byng, the Duke of Connaught, and the Duke of Devonshire, as former chief scouts for Canada.

A Midget Automobile

Czechoslovakia is to have a midget automobile which will be retailed at less than \$100, according to a report from Prague. The motor is of the front-driven, two-cylinder type, developing 18 horsepower. The cars will be two or four-seater cabriolets, with a wheelbase of eight and one-half feet.

A new factory in Sweden is to produce enough aluminum to meet Swedish requirements.
